

LAKE MICHIGAN

CATHOLIC SCHOOLS

August 2016

Dear Parents of Lake Michigan Catholic Elementary School,

According to Michigan State Law, schools must advise you of your right to be informed when any pesticide application is made to the School grounds or building.

Lake Michigan Catholic Elementary School has not applied pesticides nor do we have any plans to apply pesticides at this time. This letter simply serves to inform you that according to State Law, you have the right to know if and when pesticides are applied at your child's school.

Every effort will be made to give notice prior to the application of pesticides. In those instances when pesticides must be applied without prior notice, you will be notified as soon as possible after the application.

Peace,

Jody G. Maher
